Network Performance Review Service Package

network tuning

What it does

Network performance provides a key element to any business network. The Network Performance Review Service Package identifies vital areas of networks that require performance tuning to ensure the IT system is running at its maximum capability.

Key Services Included

- Server configuration checks
- Internetworking configuration checks
- Email configuration checks
- Desktop configuration checks
- Communication Routers/Switches/Hubs checks
- UPS configuration checks

How and when does it happen

All key services are completed in accordance with approved test script procedures and check lists. Comprehensive reports and recommendations are produced on completion.

This service package is by subscription only and occurs on a monthly basis using day to day data collection throughout the month.
