Security Audit – Standard Service Package

security

What it does

- The Security Audit Standard Service Package provides essential testing against network security weaknesses and known vulnerabilities. Using professional analysis tools, all tests are completed against existing network configuration settings. Results and recommendations for improved security standards are produced in a detailed report.

Key Services Included

- User account and password review
- Security baseline check
- Anti Virus configuration and scanning
- Firewall configuration review
- Spyware audit

How and when does it happen

- All key services are completed in accordance with approved test script procedures and check lists. Comprehensive reports and recommendations are produced on completion.

- This service package can be purchased as a one off fixed cost. The service will be undertaken only once a year. Under this offering.

- The subscription option provides saving benefits and the service takes place twice a year on scheduled dates
