Network and desktop Support

helpdesk

What it does

Provides an efficient help desk support function for Company networks. Practical, straightforward and customer focused. This service covers all day to day computer related issues

Key Services Included

- Desktop application support
- Network installations and upgrades
- System migrations and integrations
- Office relocations

How and when does it happen

The "Summit" price band provides the customer with a unique fee scale for general support. Depending on the amount of hours used in a month. The price band has three different levels. The more time used, the lower the price drops.
