1.2 Network Management Service Report Package

network management

What it does

- The Network Management Service Report Package keeps Companies informed of essential network activity. Working with the Network Management Package, a monthly report is produced containing important statistics and performance trends in a simple and easy to understand format.

Key Services Included

- System log checks
- Anti Virus Scanning and updates
- Backup monitoring
- Email server performance and maintenance
- Business critical application monitoring
- Patch management
- Server disk space monitoring

How and when does it happen

- All key services are completed in accordance with approved test script procedures and check lists. Comprehensive reports and recommendations are produced on completion.

- This service package is by subscription only and occurs on a monthly basis using day to day data collection throughout the month.
